

Welcome to the Fall 2024 issue of SCIRE Insider!

NEW on SCIRE Video

It's been a big year for video production at SCIRE. Still to come are a Continuing Medical Education (CME) series and a video on Penile Vibrostimulation, an addition to our Sexual Health video series. While you wait, see our new Aging With SCI videos below!

Aging With SCI

If you haven't yet seen our new Aging With SCI video series, follow the link below and remember to Subscribe to our YouTube channel and give us a Like - it helps to get our resource out there so more people can benefit!

NEW on SCIRE Professional

Fatigue Evidence Module

The SCIRE team has recently added a new Evidence Module: Fatigue Following SCI. Fatigue is a common secondary condition in people with SCI though few studies have measured it as a primary outcome. Moderate-intensity exercise has the most support of any intervention for reducing fatigue to date.

Our sincere thanks to the author team led by Dr. Carlos Herrera, PhD.

NEW on SCIRE Community

Non-traumatic SCI

Despite growing numbers, there is relatively little academic information about NTSCI, and even less for people with SCI and the public. We collaborated with Dr. Peter New, a leader in the field of NTSCI, to change that!

Aging Update

While working on our recent Aging With SCI video series, we took the opportunity to also update our Bowel, Bladder, Pain and Physical Activity articles to include new content on Aging!

In the NEXT Insider

SCIRE Celebrates 20 Years!

Did you know SCIRE turned 20 this year? Be sure to check out our Retrospective in the next SCIRE Insider newsletter coming early in 2025!

SCIRE covers a comprehensive set of topics relevant to SCI care. SCIRE reviews, evaluates, and translates existing research knowledge into a clear and concise format to inform healthcare professionals and people with lived experience of best practices following SCI.
